

Every Lecture. Understood.

AI-powered lecture capture that turns every class into actionable, real-time understanding checks.

01

Live Lecture Capture

Real-time transcription powered by Deepgram. No setup needed — just press record and teach.

02

AI Check-In Questions

Automatically generates smart questions from what you just said. MCQ, short answer, or coding.

03

Instant Analytics

See who understood and who didn't — in real time. Identify struggling students instantly.

HOW IT WORKS

Three steps. Zero friction.

1

Professor records

Start a live session and record your lecture.

2

AI generates questions

Smart questions appear automatically for students.

3

Review understanding

See real-time analytics on student comprehension.
